

# Identity Management Tool Differentiators

	BMC Control SA v.3.2	IBM Tivoli Identity Manager v.4.5	Waveset Lighthouse v.4.0
<b>Functionality</b> <ul style="list-style-type: none"> <li>• End-user</li> <li>• Administration</li> <li>• Audit/Report</li> <li>• Workflow</li> </ul>	<ul style="list-style-type: none"> <li>• Confusing GUI metaphor - multiple cascading windows, many choices of appearance but would be more difficult to learn and navigate.</li> </ul>	<ul style="list-style-type: none"> <li>• Mature interface, clean appearance, navigation keys.</li> <li>• Demonstrated V.4.3.2 (Access360 enRole version from Dec. 2002).</li> <li>• Identity policy requires Java Script</li> <li>• V.4.5 comes with Crystal Reports</li> </ul>	<ul style="list-style-type: none"> <li>• Easy to use and intuitive interface.</li> <li>• Interface cleaner than Control SA but not as mature as TIM.</li> </ul>
<b>Architecture</b> <ul style="list-style-type: none"> <li>• Security</li> <li>• Flexibility</li> <li>• Performance</li> <li>• Platform Support</li> </ul>	<ul style="list-style-type: none"> <li>• First to market in 1995 and still has substantially the same architecture.</li> <li>• ESS Web GUI only runs on Solaris.</li> <li>• Passport and workflow capabilities only run on Solaris or WIN NT.</li> <li>• No SSH key delivery; manual changes of keys.</li> </ul>	<ul style="list-style-type: none"> <li>• Utilizes FIPS-140 compliant GSKit to generate SSL certificates.</li> <li>• While TIM is certified to run on HP-UX, IBM had few reference HP-UX clients.</li> </ul>	<ul style="list-style-type: none"> <li>• Agentless technology tracks changes in target systems by logging into remote system as an administrator and querying for changes.</li> <li>• Highly relevant HP-UX client list - e.g. DLA.</li> <li>• Virtual Identity Manager requires only 5 attributes.</li> </ul>
<b>Management</b> <ul style="list-style-type: none"> <li>• Deployment</li> <li>• Maintenance</li> </ul>	<ul style="list-style-type: none"> <li>• Many FTEs required for support (10-15).</li> </ul>	<ul style="list-style-type: none"> <li>• Agents require installation, maintenance, and support.</li> </ul>	<ul style="list-style-type: none"> <li>• Small footprint results in quicker implementations and limits continuing support.</li> <li>• Auto-Discovery Engine simplifies the creation of unified identities across systems.</li> </ul>
<b>Vendor Support</b> <ul style="list-style-type: none"> <li>• Assistance</li> <li>• Training</li> </ul>		<ul style="list-style-type: none"> <li>• Extensive vendor support, training classes, and materials.</li> </ul>	
<b>Licensing</b> <ul style="list-style-type: none"> <li>• Structure</li> <li>• Cost</li> </ul>		<ul style="list-style-type: none"> <li>• Includes Directory Server (LDAP), App Server, JMS, and IDI (for use with TIM) in license cost.</li> </ul>	

# Web Access Control Tool Differentiators

	IBM Tivoli Access Manager v.5.1	Netegrity Siteminder v.6.5	RSA Cleartrust v.5.5
<b>Functionality</b> <ul style="list-style-type: none"> <li>• End-user</li> <li>• Administration</li> <li>• Audit/Report</li> <li>• Workflow</li> </ul>	<ul style="list-style-type: none"> <li>• GUI Administrative interface available but has limited functionality; command line preferred for administration.</li> <li>• Does not offer consolidated view when deploying agents – no operations monitor.</li> </ul>	<ul style="list-style-type: none"> <li>• Central administration of agents.</li> <li>• “OneView” monitor displays operational statistics for policy server and agents.</li> </ul>	<ul style="list-style-type: none"> <li>• No centralized agent management so admins must go to each web server to install/maintain agents.</li> <li>• No operations monitor</li> </ul>
<b>Architecture</b> <ul style="list-style-type: none"> <li>• Security</li> <li>• Flexibility</li> <li>• Performance</li> <li>• Platform Support</li> </ul>	<ul style="list-style-type: none"> <li>• Complex proxy-based architecture with many components to install and maintain.</li> <li>• Need to evaluate HP-UX support</li> <li>• Does not support variable time out per protected resource.</li> <li>• WebSeal cache improves performance but stores user credentials in the DMZ.</li> <li>• Configuration information stored in WebSeal in the DMZ.</li> </ul>	<ul style="list-style-type: none"> <li>• Supports numerous large scale HP implementations and provides WAC for HP.com.</li> <li>• Does not require a specific schema.</li> <li>• Allows authentication chaining.</li> <li>• Utilizes automatic key roll over to maintain security of communications.</li> <li>• Supports variable time out per protected resource.</li> </ul>	<ul style="list-style-type: none"> <li>• Need to evaluate HP-UX support and reference customers</li> <li>• Fewer number of relevant installations</li> <li>• Requires customization for multiple data stores</li> <li>• Does not support variable time outs per individual protected resource.</li> </ul>
<b>Management</b> <ul style="list-style-type: none"> <li>• Deployment</li> <li>• Maintenance</li> </ul>	<ul style="list-style-type: none"> <li>• Requires separate Privacy Manager project for fine-grained access control.</li> <li>• No rule testing tools provided.</li> </ul>	<ul style="list-style-type: none"> <li>• Does not require updates to individual web servers.</li> <li>• Rule testing tools provided.</li> </ul>	<ul style="list-style-type: none"> <li>• Rule testing tools provided.</li> </ul>
<b>Vendor Support</b> <ul style="list-style-type: none"> <li>• Assistance</li> <li>• Training</li> </ul>	<ul style="list-style-type: none"> <li>• Thorough training classes, mature materials and support.</li> </ul>	<ul style="list-style-type: none"> <li>• Product is up-to-date with many releases and upgrades in the next 18 months.</li> </ul>	
<b>Licensing</b> <ul style="list-style-type: none"> <li>• Structure</li> <li>• Cost</li> </ul>	<ul style="list-style-type: none"> <li>• Includes user mgmt tool.</li> </ul>	<ul style="list-style-type: none"> <li>• Does not include a User Management or LDAP admin tool.</li> </ul>	<ul style="list-style-type: none"> <li>• Includes user mgmt tool.</li> </ul>
